for rack and barrel goods.

Business Area Technology (seperate entity)

Unique laboratory with resources for monitoring processes, process development and licensing processes

For you who require a solid development partner for new products, functions and processes

Corrosion testing (salt spray, ACT, etc), design support and education

Quality and Environment

Today, everybody agrees that sustainability is the strategy for moving forward!

Companies are no longer looking for alternatives to green production. Sustainability is a deal breaker in today's society. This is where modern surface technology can make a difference.
