

Company presentation

Provexa Technology AB

February 2024

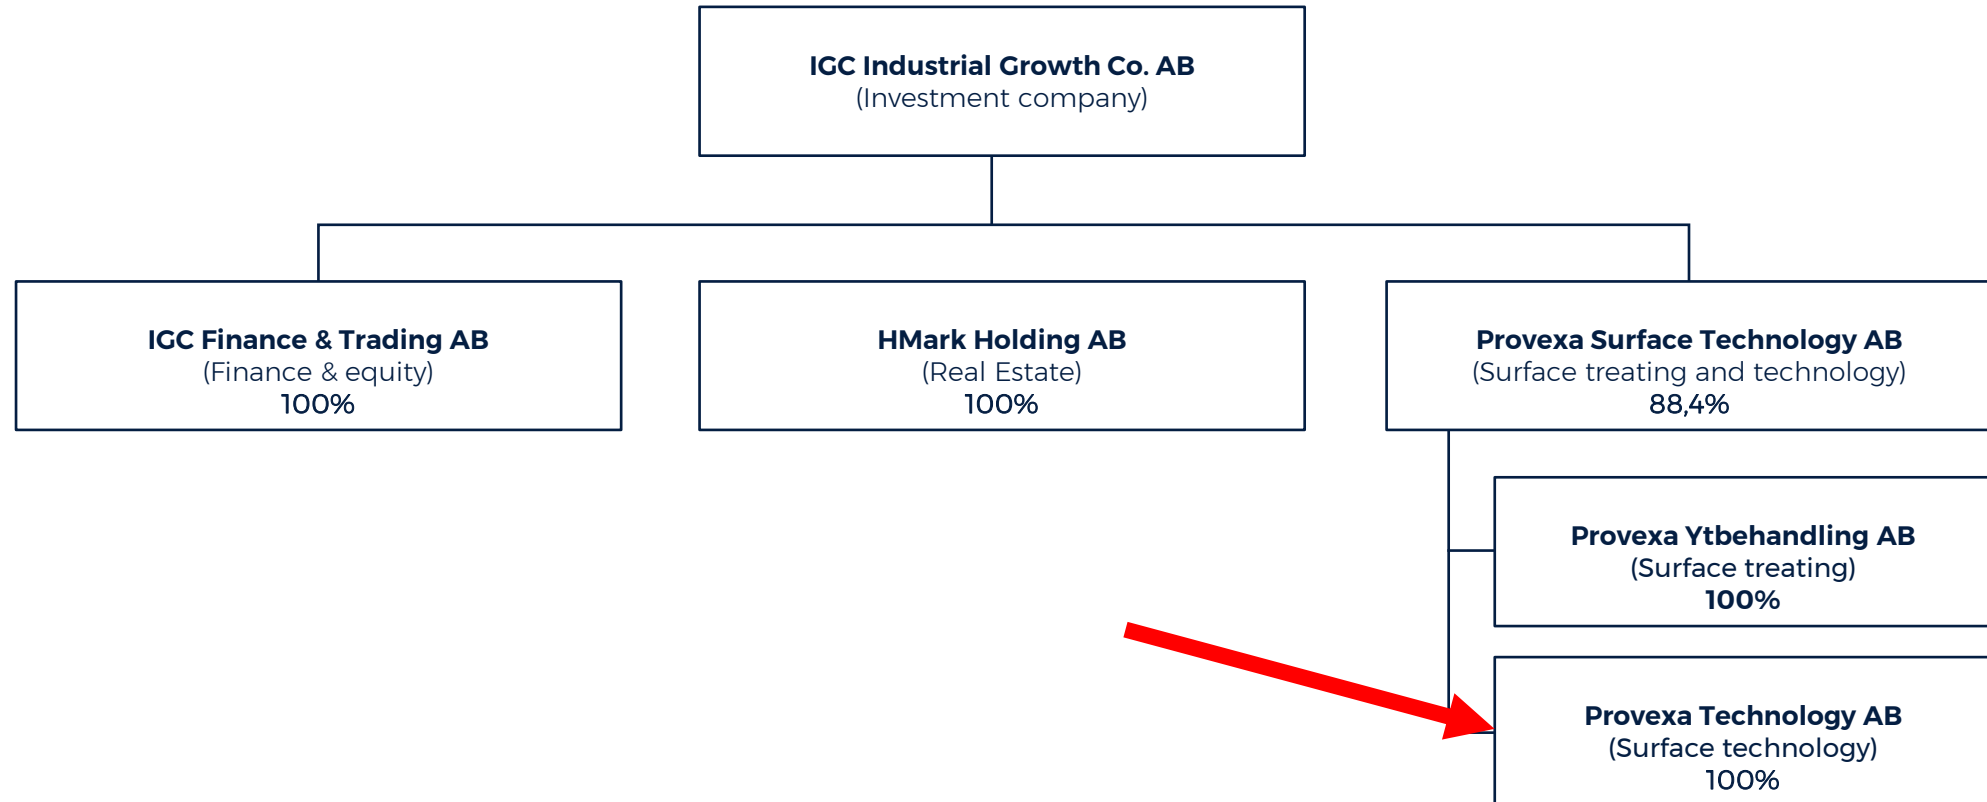

Vision

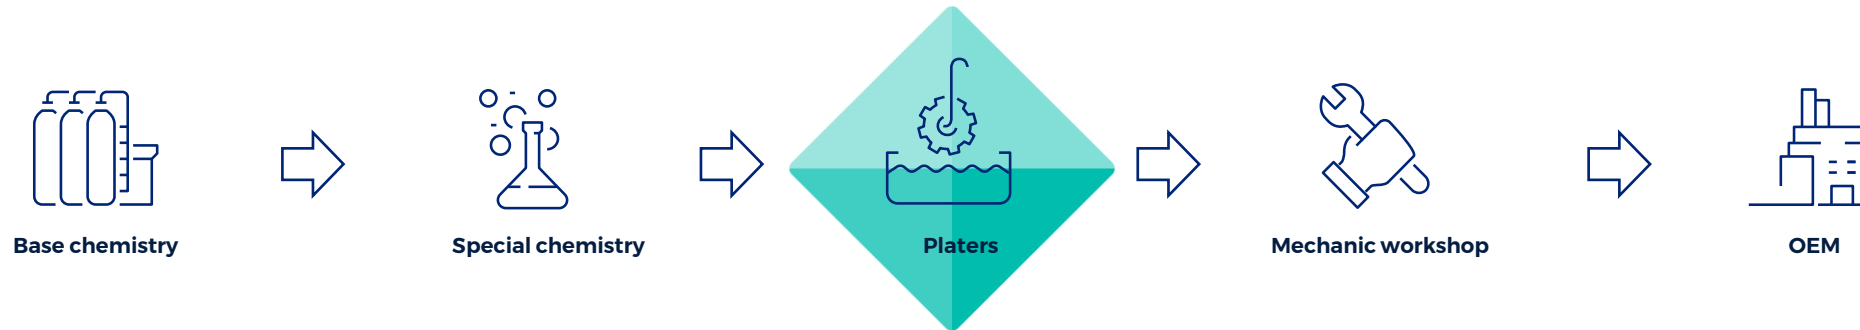

”Our dream is a sustainable world, where we can contribute with world leading surface technology.”

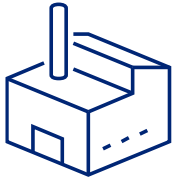

Owner structure

Bransch logics

”The demand for surface treatment has never been this big– the knowledge never so difficult to access”.

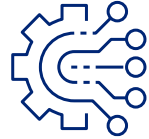

Established 1881,
estimated turnover this
year 154 MSEK (141)

100 employees

High valued service
to our 500 customers

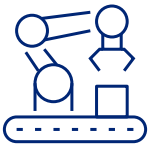

Profitable, estimated EBIT
this year 14,0 MSEK (8,9)

18 000 sqm modern
facility with good
working environment

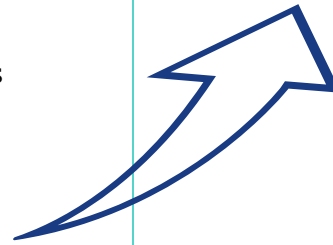

Provexa Technology AB

Wide variety of processes
with the latest
technologies

ISO 9001, ISO 14001,
ISO 45001, IATF 16949

Provexa Technology AB

Analysis, testing and specialized production

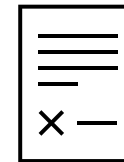

Consultation services

Licenses

Organization Provexa Technology AB

Provexa Technology AB

Unique laboratory with resources for monitoring processes, process development and licensing processes

For you who require a solid development partner for new products, functions and processes

Corrosion testing (salt spray, ACT etc) design support, education and specialized production

R&D

Provexa Technology AB conducts research and development of new surface treatment technology, often in cooperation with our customers, to create new products and improve existing products. The advantage is that we create product ideas at the research stage in a dialogue with our customers.

Business concept

Provexa Technology AB develops processes and products for OEM manufacturers, production companies and for in-house manufacturers.

We license our technology to other surface treatment companies in partnership with specialist chemistry companies. We offer laboratory and analytics services, special production and testing.

Lab services & special production

Special production

Sometimes the demands are unique, the job may be a one-time job, or the job may require extraordinary quality assurance, handling or validation. In these cases, we can offer special production organized by our laboratory. Special production at the laboratory has two production lines: one automated line with a 300 litre processing vat and a smaller 5 litre processing vat

Testing

We also offer test, analysis and consultancy services to OEM companies, surface treatment companies, research institutes and other customers.

We also offer corrosion testing in our ACT or salt spray cabinets.

Operational policy

Our 12 goals

To be the customers first choice by offering high **quality, delivery reliability** and **communication**

To be **innovative** – adding value to our customers by optimizing their products

To be an attractive place to work by offering a good and **safe working environment**, well being and **health**

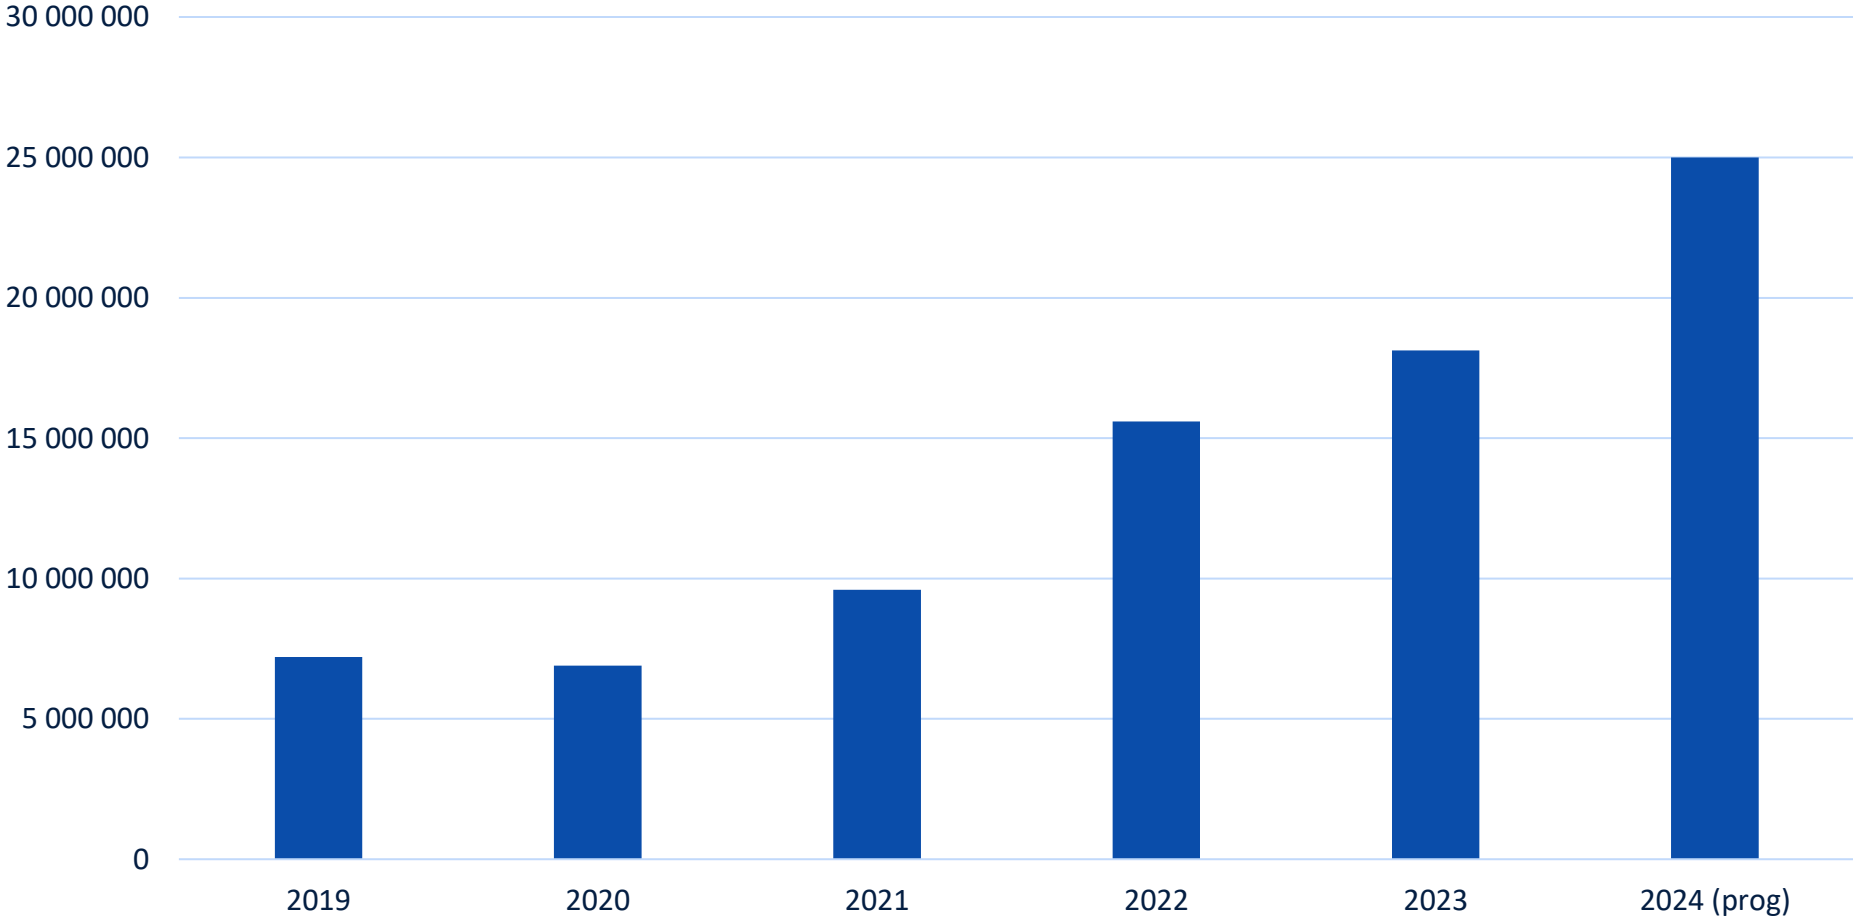

To contribute to a better world by sustainable surface treatment and resource saving production (**electricity, gas, water** and **chemicals**)

To **grow** with **profitability**

Provexa Technology AB Sales (SEK)

Quality and environment

Today, everybody agrees that sustainability is the strategy moving forward!

Companies are no longer looking for alternatives to green production. Sustainability is a deal breaker in society today. This is where modern surface technology can make difference.
